AED Sentinel is a technological-based remote monitoring system, designed and built by preparation systems, expert in the AED Ladder program program at the nation. AED Sentinel uses Hardware connected to the Internet that maintains a vigilant eye on your AED, along with an associated software platform and a control panel of intuitive users for monitoring, alerts and reports. Why do I need Aed Sentinel? Industry standards, AED laws and manufacturer's guidelines carry out the owners of automated external defibrillator (AED) responsible for ensuring that their devices that save lives are ready to function each time they are needed. The only question is whether and how they really do. Today's confidence in Human AED inspectors leads to a high rate of non-compliance, which means that a large number of AEDs are incorporated or misused for long periods of time. As a result, it is possible that more than 1 out of 5 AED are not ready for use (more than 800,000 AEDs potentially unbeatable in the US. UU). The consequences? Greater risk of AED failure, avoidable cardiac death and avoided judgments. Who should I use AED Sentinel? Any organization with AEDs can benefit from the property facility that AED Sentinel provides. How do you do and AEDS AED Sentinel models work with? AED Sentinel works with all current AED brands and models installed in wall-mounted cabinets.
