Our hack tool works on all devices which include android, iOS and desktop. It works on all almost all browsers. Our tool will help you to climb to #1 position in agario within few seconds. Using our bot you will be able to increase your speed, select size before playing, make yourself invisibe and much more. Our team has been working hard form past many months to create most stable and awesome agario cheats. Agario Hack Features: > Make Yourself Invisible > Speed Hack > Zoom Out And Zoom In > Size Hack > 100% Safe To Use invisible Hack: Using this feature, You will be able to make yourself invisible. Other players will not be able to see you. You need to select your opacity value, From 0 to 10. If you select your opacity value 0 then your cell will be invisible to other players. Speed Hack: Using agar.io speed hack you will be able to increase your speed even when you are a big cell. No matter how big your cell gets, You will be able to move quickly easily. I suggest everyone to use this hack once your cell mass gets near to 200 as it would be easy to control the speed. Zoom Out And Zoom In: Using this feature you will be able to zoom in or zoom out of the map. You will be able to easily find which cells are near to you, who is coming in your direction and where you can find smaller cells than you. Size Hack: Using this cheats, You can select your mass before playing the game. For example: You can select your mass to be 500 and when you will start to play, Your mass will start from 500 instead of 10. Instructions: Our agar.io cheats bot is easy to use and you can find the documentation file in the cheats folder. It is actually easy to use our tool. Simply follow the controls below: Invisible: Press I and +/- for invisible mode. Speed: Press S and +/- to increase or decrease speed. Zoom Out/Zoom In: Press Z and +/- to zoom out and zoom in. Size: Once you will start to play the game, You will see a box asking you to select mass of your cell. Simply enter the value and start to play. Download Agario Hack As everyone knows that teaming is one of the fastest way to get into top of the Leaderboard. People who mostly spend their time playing agar.io have started to hate it. Players have been found posting on their social network accounts that teaming should be banned from agario. At last, Developers have banned teaming in FFA mode. If you are dead, then that player will be sent to a custom different server if he is found teaming. It will make easier to destory teams and will limit the power of teaming. If two players are teaming then one player will be sent to a different server. It will stop people from teaming with each other. It still have not been found how system finds teamers. As many of us already know that Agario is a browser based game which is one of the top trending games around the world. It's fun to play agar.io but only if you can become #1 player. Getting into top is not easy at all, You will need to eat as many cells you can for that. Agar.io is one of the most amazing game that can be found on the internet. We are here to help you become #1 player in the game. Every player in agario will try to eat you. Before you start the game you need to select a name, You can select a name according to your wish or you can select a skin. You can read more about skin in our another post. The main idea about the game is to start as a small cell and start to eat other cells smaller than you so that you could grow into a bigger and stronger blob. Once you become biggest cell in the server, Your name will start to appear on the leaderboards. Hack Features: - Zoom Hacks (Enter the value and enable the hack). Small number == more zoom, tested with 0.08 value NOTE: If you're having problem can't set the value for example can't use (-) - Please set your device language region to USA Cheat Walkthrough: App Installation Instructions: 1. If necessary, uninstall the App Store version of the app if you have it installed on your iDevice. Make sure to back it up so you don't lose your progress. Alternatively, you can use the 'Custom Install' option to install the new app as a duplicate without having to overwrite or uninstall the original. 2. Once the installation is complete and you see the app on your Home Screen, you will now need to go to Settings -> General -> Profiles & Device Management. Once there, you will need to trust the new certificate that is related to the app you just installed. Then simply open the (hacked) app. If you require more information or help, please read our Frequently Asked Questions topic on iOSGods.com. App Information The browser game phenomenon comes to iOS!
