Consumer Smartphones, Notebooks and Tablets, Wearables and More Corporate About Huawei, Press and Events, and more Enterprise Products, Solutions and Services For Carrier Products, Solutions and Services for Carrier Manufacturers are more and more by offering customization options. However there are many things that users would like to do, but they are not possible. For this reason, many times suggestions can be made for brands, which sometimes have an effect. Today we are going to see how to put a video as a background of the lock screen on Huawei phones. This is one of the features that do not have a native method of customization of the mobile phone. However, we have enough tools to do it. For this, we will have to satisfy some requirements, such as having emui 10.1 or emui 11. Put a video as a background of the lock screen can be something spectacular. Set a video like Wallpaper requirements in Meetwe can test with the video for example, which can be to be Download from here. However, we can put any video recorded with our mobile phone or another type of clip downloaded from the network, as long as it is in vertical mp4 format and with a resolution of 1080 x 1920 pixels. Furthermore, it should not exceed 30 fps, 20 megabytes of size or 20 seconds in duration. download Huawei theme studenthen, we will need to download the Huawei Theme Studio tool on our computer, created to create themes and focused mainly on the developers. Once installed, we will have to run on your computer and open a new project. Once the name is inserted we will have to choose the eMUI version and lock screen as the type of project. then, next to the left navigation bar, we select Video as the type of screen lock and confirm the selection. Now we will see a video that is loaded by default, but we can replace it from the edit area and select our video, both the previously downloaded or the one that meets the requirements we have also reviewed. Now we will preview with our video. You should use the FileNow, we can use the cursor on the blue bar to select the frame we want to use as a preview of the video lock screen. Furthermore, other aspects such as color, transparency, size or alignment can be configured. Once done, you can click on the menu bar and click on an Export and save the file in .hwt format on our computer. apply of the creation / downloaded video in order to apply the video as a lock screen, we will fool the system . To do this, we will have to go to the Huawei App Themes, download and apply a lock screen. Then we will have to copy the .hwt file that we have created previously for our mobile phone, inside the Huawei / Themes / Hwunlocks path in the internal memory of the mobile. When we open this folder from the file application on the mobile phone, we will see that it contains two files. The one with the video block screen and one with a strange series of numbers and letters, which is the lock screen that we previously downloaded from themes. What we need to do now is to copy the strange file name and cancel at a later time. Now, let's rename the video block screen with the name we copied. The last step is to go to the question reasons and select the downloaded lock screen for free and touch again to Apply. Although the previous background preview is displayed, we actually actually applied the downloaded video. First, press the Windows + I key to enter the new settings page, and then click Customization. From the menu to the left, select Screen Lock. You can set the background here.
