Movies Review of Joy: For me, this film is one of the best films published in 2018. It is a pleasure for me to have a good movie, few intelligent speakers, and these collective speeches reveal the central idea of the film. I know you take a lot of stick to be the mainstream popular movie, but honestly I can't think of anything wrong with the movie online. I am the great fan of films like this every single performance is incredible. Not to mention that it has the best music in a movie. A movie much appreciated for me. This director is fantastic.
