Plushie tycoon guide

You jnAccount: Log In or Register | New to Jellyneo? Click here! Having problems on the farm with Slorgs? Meepit too many to feed in very little time? Then try some of the game guides below for some tips on Neopia games! They are listed in order the f alfabÃ© tica by the name of the game. Once you have taken a look, maybe I'll be interested in taking some global challenges. Looking for some cool game cheats? Click here for our fraud master list! He tells © m all cheats for Neopia games, set in games per team Neopets. The Games Master, AAA, organizes events twice a year, ie the Daily Dare and the master Challenge games. You can find information about all your past events à â here. We also have a guide to m © Game New Challenges here. Whether you are looking to make 50k per day, using a mixture of regular games and sponsor, see our 50k Day one guide. Occasionally, Tamba © m post orientaÃŠÃpes of vÃdeo of vÃrios games on our YouTube Channel . See orientaÃŠÃpes specialized for Dailly Dare and punctuation £ the best you. Flash-free game estÃ¡ Below a list of guides for all the games continue to work aft death of Flash. (In other words, you can still play these after January 2021.) the whole game Guides Below estÃ¡ a complete list of all our game guides. Most of these steps require Flash to be able to play, so that does the £ serÃ¡ playable in 2021 minutes © TNT new messages converted versions. To Search game guides older games that does the £ there are more? Visit our comitÃ game guide © River Ã Ã -This pagee was last updated on July 31, 2021. His jnAccount: Log In or Register | New to jellyneo? Click here! If you already was interested in à â start your prÃ¡prio business, Plushie Tycoon Ã © definitely the game for you! The game is ©, basically, a game in which you run your prÃ¡pria plushie company - everything from produÃŠÃ E ATA © commercialization to the £. A new game in the second comeÃŠa each mÃ's and lasts for £ duraÃŠÃ the same mÃ's. The goal during this time to find out which Ã © sÃ £ plushies the rentÃ¡veis, keep making them and vendÃ® them, and rake in as many Neopoints as you can! At the end of the month, you can win some prÃ© mios fantÃ¡sticos if you took the right decisÃpes. This guide estÃ¡ here to help you to comeÃŠar. Plushie Tycoon can be a very difficult game if you go blind - hÃ¡ so much to take care and to keep on top of that Ã© easy to get lost or confused. I strongly recommend reading atravÃ© s of the entire manual before of getting to play the game, because There are many nuances to tycoonng that you should know before jumping. The first day Ã© easiest of getting off this guide to what to do on your first day. I'll explain things as avanÃŠamos. You need to do all over again, if you choose to play again in a new mÃ's. You Tamba © m going to be doing most of the following each time you want to start a new batch of plushies. ComeÃŠar for your adventure, click the link "Create Store" on the main page of Plushie Tycoon. You start with 50,000NP. This Ã© © your money on hand and the £ will fluctuate as you comeÃŠar to buy materials and plushies sale. These Neopoints sÃ £ only in the game for them on the part of the £ Neopoints you really have on the rest of the site. The amount of Neopoints you have in Plushie Tycoon Ã© shown in virtually all pages of the game, make sure that you are constantly keeping an eye on it. If you spend it all, you lose! Reload the page by clicking the link Main page (Note: Do the £ refresh the page at any time during play, as this can cause you to spend more neopoints than intended and you may lose match!). Some red text should appear at the top stating that you can customize the game to your time schedule prÃ¡prio. This will very © to do. Do not judge by your own time spindle. Try to look at this page, which lists the horizean spindles on a simple table, to find out what the time spindle you should be. You want to set it up for one that will allow you to be around for more during the hours Plushie Tycoon from 09h00 - 17:00, because it is when your your your The factory and warehouse are open. You will want to be able to be close to a computer for most of this time. Each update happens in: 01 After the time, then your first update of the day will be at 10:01 and your last will be 17h01. ** Note: Upgrades are now taking place on: 29 After the time (on April 24, 2018), and are very slightly later every day. Make sure you get this when you choose your time spindle ** if you look at your store, a factory and warehouse, you will notice that everyone asks you to pay rent. You must pay for all 7 days of play and do not forget, or you will lose your game! You can see how many days remain before the next payment of the rental in the main page. Make sure you do not update any of your buildings at this time, pay only the rent. Pay your rent or you will be charged late fees! Your next play in the game is to buy materials. Go to the pace of gross goods to buy and see what you have. The prices of items change after each update. Each batch of peers that you need to produce requires a certain amount of material and each batch consists of 100 folts. To find out how much you need to type plushie, head for this page and roll down in the middle. Each batch of paper needs a filling unit and a packaging unit. The number of cloth units that are required are different for every plushie spy. Before buying any supply, you need to calculate how much it will cost. For example, if you are going to make a speech that requires 4 cloth units to make 100 porn, you need to add the cost of 4 cloth units + 1 stuffing unit + 1 packaging unit. You will probably want to make a spy that requires accessories (because you will sell more), so do not forget to add 1 unit of rare gems too. If the total reaches less than 3,900 neopoints, buy supplies. If you do not, wait for the next update. This page has a graph showing how much cloth each type of plushie requires and if they use accessories. The only accessory you should buy are rare gems. Fighting filling !! Once you have a good price for supplies, start buying your materials using the table in the link that I posted above. Do not stare at this time, even if you think the materials are cheap - it is not worth at this stage of the game. Just buy as much as you currently need. For your first time, try to keep 5 or 6 lots, or 500 to 600 foliage. You can make all lots a specimen or all different species. Once you have purchased your materials, it's time to go to the factory! A big factory for a small operation, but you will grow on it! When you get to your factory, the first thing you will want to do is click on "Start New Work". Choose a spy from the drop-down list (you must have purchased enough materials to cover any spy that you would do). At the next page, select your cloth colors and what materials you will be using for this plushie and then select as many you want to make that plushie. Be sure to make lots of 100 folts. This means that you have to repeat the process of starting a new work several times, but this is important for the processes of manufacture and sale arriving later. If you're doing more than two lots of porn (you should be!) You'll be asked to update your factory - make it! You are only going to make more breaches while going beyond the game. Now, end up putting the rest of your batches, and then click "Existing Orders." There are the lots you just sent. But wait! Who will make all these bottles? Click on the "Personal" link in the factory and you will see a happy looking garrl. He is your permanent manager (you can not fire it). You need to hire To make these bash! Make sure you have enough managers to keep your books on the right track! Avoid desistances and graduates - they are not worth it. I usually use trainees. Rental 250 trainees for your first first (Note: You may need to hire 100, 100, then 50 trainees, because there have been problems with the 250-time contracting). But wait again! All these workers obviously go away if left alone. So you need some managers who know how to crack the whip. Try to maintain your proportion of workers to the managers at 1:10 (1 manager for every 10 workers). So hire 24 managers (this makes a total of 25 years when you include your permanent manager) and let them run loose. But, oh no, this will cost a lot of money, will not it? Here is the trick for this: you will only be hiring these workers for an update. Contract them and, once the next role update (in the XX: 01), shoot them all! They did most of the furry that they will do and the leftovers can be finished with the next workers that you hire later on the day or tomorrow. You must keep a manager at all times - it can not be fired! So make sure you take this into consideration when hiring your managers for a work force - you really need only 24 managers, not 25. Have also in mind, but, That you will always have 82np (the salary for a manager) removed your money into all the updates, so never let your Coh get very low because if you go to the speech, you lose the game! I suggest having at least 1,000 neopoints to hand at all times. Now that the troubles are made, we can ship them to your store! Time to fill this empty warehouse! The next stop for us is the warehouse. Once your factory has produced peers, visit any page in the game to start the loading process. The loading times on this page only begin after having visited a game page after an update (in other words, if you do not go back to the game until 20 after the time, then it is when loading time is started). Each batch of peers will have a certain amount of time to carry, dependent on how many hundreds of pornstars are in the lot and what size of your warehouse is (more about it later). For a comprehensive list of how much time will lead so that your teams are ready to send, check out this page again. While it may be tempting to update your warehouse to the level 9, so your peeling charge more fast, do not do it! You are still in the learning stage and you can not spend noopoints on warehouse upgrades yet. Once you have a better sensation for which the peers sell the best (and you are doing many neopontos!) You can start upgrade. Once your hairy are ready to send, go back and check all the selection boxes and send them. It takes 5 minutes before your peers arrived at your store. Plushies for sale! Your store is where all your sales are made! To see how the troubles are selling, click on the "Sales" link in your store. You will not have np from your batch until all 100 leaves are sold. Here is that the part of the puzzle of Pluchie's shooter really kicks at high speed. You have to find out what words are lucrative. Some will give you a liquid loss, some will have just about breaking, and some will sell as crazy! It is up to you to remember which peeries you sell well, which involves writing and accompanying a little. Once you get the way you can be sold for the maximum, you can start earning much more money. However, which peers sell well is different for everyone and changes every month! It is an act of equilibrium that you will need a small practice before dominating it. There are also several upgrades to your store. We'll talk about these later in the guide, but definitely update your store at this time. You do not know how to do this, but you want your peers to sell quickly. I suggest start upgrading the three Options and buy the first four announcements. You will work to update this throughout the game, but it is important to start at the right. The logging update of your store is 1 minute after the time, as with everything in the game. I hope you have sold enough peers to start doing more - but if you do not have it, keep waiting until you do! Guard Good job! Repeat, repeat, repeat and be in the basic of the shooting of Peliccia. It's a time-consuming game, no doubt, but it's too fun. Continue reading, however. There are more aspects for the game that you have to know before actually entering it. The basic game will be progressing as above for most of the time playing, but there are some more things you should know that they are not always part of every day. Extra information Remember how I told you to make lots of 100 years? This is important for the beginning of the game only. Having smaller lots means that you will have more fastested films more fast and and more pornstars have sold more quickly - which means that you will receive your neopoints more fast and can repeat the whole process earlier. Later in the game, when you have more neopathos, you can afford to wait on larger lots. Each of your buildings (shop, a factory and warehouse) can be updated and expanded. Each of these things does a different thing to help in your plushie process. Technics - factory upgrades are called different "levels". You will have to pay for more levels while advances. A new level allows you to have more lots of peers at once, then there are more for your workers to work. The final touches that make your hairy sell! WORMENT - Updating your warehouse allows your finished files to send more fast. Having to wait three or four hours can be a pain when you have a huge load of peers to send your store. When updating your warehouse, you can reduce waiting times drastically! This will allow you to make even more quick profit. Wait to update this until you are comfortable how much profit you can do. You should also remember that loading times listed on this page should be duplicated for batches of 200, triplicated for lots of 300, etc. Store - Expansions are essential for the game. Your store can contain even 400 peers for each level, even the level 9. Once the level 9 is reached, it can carry out unlimited porn. Without proper advertising and look at your store, your apushies will be selling in a trace. You have to attract people to your store, and you will have to spend money to do this! Focus on the first 3 or 4 levels of upgrades and announcements until you have a comfortable amount of Neopoints to continue doing pornstars and provide updates. This can take several days. Why do not you tell us? Rent and tax rental is due every seven days in all three properties. You have at 48 hours to pay your rent, which means you can continue doing porns if you do not have money. Do not try to update anything during the time you are "late", however, how this will automatically pay your rent for you and you can end up bankrupt! Taxman also visit in the daytime day (at the exact time you created your game) and there is no way to avoid it! He will only take money from you if you have more than 50,000NP COH, but how much it becomes larger and higher, depending on how much you have! I suggest you keep your neopents invested in the Plushie locking process to avoid paying many taxes. Make sure you write exactly when you started the game. Also it is advisable to start playing every time when you will normally be playing the game. In other words, do not start playing plushie tycoon at 2:00 in the morning, unless it is when you expect to play every day. Just as in the real world, you will be avoided if you do not pay your rent! Promtions If you have more than 50,000 neopoints in the hand when the game is finished, you will receive a trophane and a Neopoint Prom. You can congratulate yourself and tell all your friends that you are now a shooting of Peliccia! Unfortunately, finishing the game with less than 50,000 (less than you With!) It will not give you anything except maybe some skills to help you do better in the next month. Below is a table of the practices that you will receive depending on how many neopontos you did and how many how many You sold it. Plums Tycoon Promtions If you finish the game with between 50,000 and 250,000 Neopoints: And you sold less than 1,000 Pelicias - you get 1k and you sold at least 1,000 apushies - you win 2k and you sold at least 2,000 years - you win 4k And you sold at least 3,000 years ago - you get 5k and sold at least 4,000 pornstars - you win 12k and sold at least 5,000 pornstars - you win 14k and you sold at least 10,000 peers - you receive at least 20,000 peers - you end 18K You finish the game between 250,000 and 1,000,000 Neopoints: and you sold less than 5,000 times - you win 24k and sold at least 5,000 peers - you win 28k and you sold at least 10,000 porn - you win 32k and you sold at least 20,000 Pelushies - You win 36k and sold at least 50,000 peels - you win 40k and sold at least 100,000 troubles - you win 44K if you finish the game with more than 1,000,000 Neopoints: You sold less than 20,000 times - you start 64k and you sold at least 20,000 plushies - you get 72k and sold at least 50,000 pelushies - you receive 80k and sold at least 100,000 pornstars - you get 88k and sold at least 200,000 times - You receive at least 500,000 Pelicias - You get 120k and you sold at least 1,000,000 from Pelicias - you receive 160k and sold at least 1,250,000 times - you win 200k and sold at least 1,500,000 times - you win 240k and you Sold at least 2,000,000 times - you win 320k completing the game with more than 50,000 Neopoints also available will give you a thorny legal avatar!
