Tamba Ã © M An Excellent Cost x Benefact and can be used in various systems, either by offering high performance in powerful systems or practicality and low consumption in systems where only one non-sound original and original attending different types of speakers, such as, for example: Ã Ã ¢ ~ Ã ¢ ~ 6). Ã Driver, S. and subwoofer TweetersÃ ¢ Ã ¢ ~ Ã ¢ s 800 RMS. Examples of use: Project 1 Ã ¢ Ã ¢ ~ "driver Two" inches.project 3 Ã ¢ Ã ¢ ~ "2 Subwoofer" Subwoofer ": the maximum power @ 12.6 VDC Ã ¢ Ã ¢ ~ 1 ohm: 800W RMS (4 x 200 W RMS) Ã ¢ Ã ~ 12.6 VDC Ã ¢ Ã ~ 2 ohms: 500W RMS (4 x 125W RMS) maximum Ã f @ 12.6 VDC Ã ¢ Ã ~ 4 ohms: 240W RMS (4 x 60 W RMS) Model 2 ohms: the maximum power @ 12.6 VDC Ã ¢ Ã ~ 2 ohms: 800W RMS (4 x 200W RMS) maximum @ 12.6 VDC power Ã ¢ Ã ~ 4 ohms: 500W RMS (4 x 125W RMS) Ã ¢ Ã ~ 12.6 VDC Ã ¢ Ã ~ 8 ohms: 242W RMS (4 x 60 W RMS) Sensitivity 250mV input (with the 100% level) Separation between the channels (Crosstalk)> 60dBÃ ¢ ndo signal / noise interface> 96DBressed frequency from 20Hz to 36kHz (-1dB) crossover high pass (HPF) 80Hz (-12dB / 8 Ã ¢ °) fixed low-pass crossover (LPF) 80Hz (-12dB / 8) fixed prevention 18K input ohmÃ ¢ system Short protection in 73% / of power supply voltage in the low / high output advancement XIMA 16VDC-rest consumption @ 12.6 VDC: 1.10A maximum musical consumption @ 12.6 VDC: maximum consumption 43a in sign sine (1kHz) 12.6VDC: 86Adimensions (WxHxD) 168 x 54 x 220 mm 1.40kg TS800 was one of the best-selling modules by the manufacturer, as it offers great versatility and can be adapted to various automotive audio systems. It 'was launched with the TS line, and by the time he received several updates. Their last was the TS 800 Compact, with improvements in technology, smaller and with better cost-benefit ratio. With the demand from the automotive market of the sound, he ended up leaving the line to Taramps amplifiers, and gave space for the new DS line, the Taramps DS800. amplifier module Taramps DS800 The new model, now has a greater capacity of amplification, as it has a lower rate of output distortion. The power is also increased in size and received finer adjustments. So, has successfully continued success of the previous models, the Taramps TS800. See Technical Specifications: Model 1 Ohm: the maximum power @ 12.6 VDC Ã ¢ Ã ~ "1 Ohm: 800W RMS (4 x 200 W RMS) the maximum power @ 12.6 VDC Ã ¢ Ã ~ 2 ohm : 500W RMS (4 x 125W RMS) the maximum power @ 12.6 VDC Ã ¢ Ã ~ 4 ohms: 240W RMS (4 x 60 W RMS) Model 2 ohms: the maximum power @ 12.6 VDC Ã ¢ Ã ~ 2 ohms: 800W RMS (4 x 200 W RMS) a maximum power @ 12.6 VDC Ã ¢ Ã ~ 4 ohms: 500W RMS (4 x 125W rms) Ã ¢ Ã ~ 12.6 VDC Ã ¢ Ã ~ 8 ohms: 240W RMS line (4 x 60 W RMS) line DSA Reference DS-800A 4Nary 4:00 of the signal channels / noisy ratio> 96DBresses 10Hz frequency to 25khzimpedary 16K OhmDistortion total harmonic (THD) < 10% Protection System short A Sauda / feeding feed 9 VDC-Tension maximum of ~ 16 Vdc power consumption at rest the 1,0A-musical network consumption @ 12.6 VDC: 38Am maximum consumption to sign sine (1kHz) 12.6VDC: 76Ah Dimensions (WXHxD) 184 x 54 x 190mm Weight: 1.40kg 2. links with installation Tips the Atencece It is not responsible for the installation / assembly of the products. According to Federal Law No. 11.291, the show expanded to noisons above 85 dB can cause damage to the auditory system. E 'for my car sound? If you are a beginner and you ride your first car audio system, advanced information, can confuse a bit 'at the time of choice, then you may want to read the post: How to choose an amplifier module? Which speaker should I use? For proper use, you must be alert to the RMS value of the speakers. Also, choose the posting of the speakers is another point For it is always good to marry the final result of impedance (what is an impediment?) Of the speakers with the amplifier. See Explanatory Messages: How to connect the speakers in the Amplifier module that Power (RMS) apply to the speakers? How to install the module? Initially, I recommend going to a specialized store and your trust in your city, so we can offer you some suggestions on how to install. See the post: How to install a module amplifier? How many batteries do they use? The amount of energy in the system will determine the level of safety and automotive sound performance. How do we know how many batteries do you need? See how it works: How many batteries use on my automotive sound system? What use of the cable / wire on installation? There are many factors that influence these factors, but feeding are in relation to cables. What use cable gauge for the amplifier module? To avoid the presence of Noisons in the automotive sound system, as well as reducing maintenance, we recommend quality RCA cables, see: Use a RCA cable that in my sound by car? Pirass for 11 years in the automotive and ex-competeritor SPL. Participant of Uhio student courses (Renan Lopes) and Advanced Uhio course (Mayasounds). (Mayasounds).
