What states have travel restrictions due to covid

As of May 17, 2021, New Jersey's travel advisory is no longer in effect. The CDC, however, has recommendations for both vaccinated and unvaccinated travelers. Travelers leaving New Jersey should check with the travel destination and transportation carrier (i.e., airline, cruise ship, etc.) to see if there are additional health and safety protocols or requirements, such as proof of a negative COVID-19 test within days of departure. Travelers should also check with their employers, schools, and other entities that may have quarantine policies for individuals returning from travel. Currently, the CDC recommends delaying travel until you are fully vaccinated. Domestic Travel According to the CDC, unvaccinated individuals who do travel should get tested 1-3 days before their trip, 3-5 days after travel, and stay home and self-quarantine for 7 days after domestic travel. For those traveling to New Jersey, domestic travel is defined as lasting 24 hours or longer to states or US territories other than those connected to New Jersey, such as Pennsylvania, New York, and Delaware. For more information, refer to the CDC's guidance for domestic travel. International Travel The CDC requires all air passengers arriving in the United States from a foreign country to get tested for COVID-19 no more than 3 days before their flight departs and to present the negative result or documentation of having recovered from COVID-19 to the airline before boarding the flight. For more information, visit the CDC website. In addition, with specific exceptions, foreign nationals who have been in any of the following countries during the past 14 days may NOT enter the United States: India, China, Iran, countries in the European Schengen Area, United Kingdom, Republic of Ireland, Brazil, and South Africa. For more details and a full list of exceptions, refer to the CDC's update on travelers prohibited from entry. Testing COVID-19 testing is available to everyone in New Jersey. You don't need insurance and free testing is available. Find a testing location near you. Domestic Travel: The COVID-19 outbreak in United States is a rapidly evolving situation. The status of the outbreak varies by location and state and local authorities are updating their guidance frequently. The White House's Opening Up America Again plan means some parts of the country may have different guidance than other areas. Check with the state or local authorities where you are, along your route, and at your planned destination to learn about local circumstances and any restrictions that may be in place. International Travel: The Department of State advises U.S. citizens to avoid all international travel due to the global impact of COVID-19. In countries where commercial travel options remain available, U.S. citizens should arrange for immediate return to the United States, unless they are prepared to remain abroad for an indefinite length of time. For more information, visit the Department of State website. For more detailed information: Editor's Note — Because few states still maintain Covid-19 travel restrictions, CNN will be updating this story less frequently. The 50-state listing was lasted updated in its entirety on August 4. CNN will resume more frequent updates if the situation changes.(CNN) — Total cases of Covid-19 reached around the 35.2 million mark in the United States by early August 2021. Domestic US travel picked up considerably in the summer of 2021. Very few states had travel restrictions as we entered August.Despite all the eliminated restrictions, new troubles have emerged. The combination of unvaccinated people and the more contagious Delta strain of coronavirus has led to a new Covid-19 surge in the United States.As of August 4, the Centers for Disease Control and Prevention still warned against nonessential travel for people who are not fully vaccinated. Fully vaccinated travelers do not need to self-quarantine, and they don't need to test negative before or after their travels unless the destination requires it. CDC guidance says, They are still required to wear masks on public transportation and in transportation hubs such as airports and are advised to wear masks in indoor public places with significant Covid transmission.If you do decide to travel to another state or territory, you should still check out the latest local guidance before you go. Even though almost all states have dropped their travel restrictions, their official websites have important Covid-19 safety information. This list is alphabetical and includes links to state websites:In northeastern Alabama, Little River Canyon National Preserve features not only a swift flowing river but also overlooks, waterfalls, hiking trails and a scenic drive.Forrest Brown / CNNThere are no statewide travel restrictions in Alabama. [-] mandates in place in May 2021 SOPA Images/LightRocket via Getty Images The state-by-state view of U.S. travel restrictions, Covid-19 testing and quarantine requirements for May 2021 shows a country brimming with confidence after a successful vaccination program and where a vast majority of Americans (72%) have summer travel plans. In line with current optimism, there are 40 states with no state-wide travel mandates in place, as month-by-month, the barriers to travel are slowly receding in time for summer: more than a third of all Americans are now fully vaccinated against Covid-19 with the impressive statistic that 90% of Americans are now within 5 miles of a vaccination site. people are already on the move. There was a pandemic-era high for air travel in the U.S. on Sunday 2 May where-despite figures being very low compared to 2019 numbers-over 1.6 million people were screened at U.S. airports, as reported by AP. It was the highest number since 12 May 2019 but still 35% less than a comparable Sunday, pre-pandemic. The TSA has screened over 1 million people every day since 11 March 2020. with uncertainty over new variants of Covid-19 and whether international restrictions will be relaxed (and when), many travelers are planning domestic trips. Brian Chesky, CEO of Airbnb told CNBC that millions more hosts are needed to meet summer demand and The Wall Street Journal reported how Hertz, Avis and Enterprise all have major shortages of car hire stock, over the past month, 4 more states have relaxed travel restrictions: California, though people are still encouraged to quarantine upon entering the state; Kentucky, although out-of-state travel is discouraged and quarantined advised; Maine, although it reserves the right to quarantine from high risk states, although there currently aren't any; and New York lifted travel protocols April 10 but all arrivals must fill out a travel form. That leaves only 10 with state-wide travel restrictions. The following states do not currently have any state-wide travel restrictions: Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Indiana, Iowa, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Washington State, Wisconsin and Wyoming. 10 states currently have state-wide travel restrictions These are Hawaii, Illinois, Kansas, Massachusetts, New Hampshire, New Jersey, New Mexico, Oregon, Rhode Island and Vermont. (Washington D.C. also has travel restrictions). Old surfboards lined up as a fence in Hippie Town. Paia, Maui, Hawaii. getty In order to bypass the 10-day quarantine, passengers over the age of 5 must have a negative nucleic acid amplification test (NAAT)-taken at an approved site-either in their hands upon arrival or uploaded into the health form online. This form will give passengers a QR code which can be given to airport screeners upon arrival. The situation has changed regularly across the different islands, so check Hawaii's Safe Travels website before travel but at the beginning of May, Kauai had rejoined the Safe Travels scheme for the state and the same rules apply upon arrival as everywhere else. Illinois-there are now 31 'safe' states In Illinois, travel is unrestricted but arrivals into Chicago are categorised into two groups, orange and yellow, based on the infection rates in the home states. The list of safe states, from which arrivals are not subject to any restrictions has risen to 31: Oklahoma, Mississippi, New Mexico, Arkansas, Louisiana, Nevada, Kansas, Wisconsin, California, Wyoming, Missouri, Hawaii, Utah, Arizona, Texas, Kentucky, Idaho, Montana, Alabama, Georgia, Tennessee, South Dakota, Maryland, Nebraska, Ohio, South Carolina, Virginia, Vermont, Alaska, Connecticut, District of Columbia, and Iowa. Anyone from an orange state must quarantine for 10 days or have a negative Covid-19 test result no more than 72 hours old. This currently applies to 18 states: New Jersey, New York, Rhode Island, Florida, Delaware, Colorado, Pennsylvania, Massachusetts, New Hampshire, Minnesota, Michigan, Indiana, West Virginia, Maine, North Dakota, North Carolina, Oregon, and Washington. (Illinois is not currently categorised on any list). The Grinter family farm just outside of Lawrence, Kansas. getty Kansas-quarantine list expanded for many countries/states over specific dates Kansas has some of the most specific travel requirements in the U.S., in that a mandatory quarantine is needed for anyone who has: traveled on or after April 22 to Minnesota or the countries of Argentina, Aruba, Bahrain, Croatia, Cyprus, France, Sweden and Turkey; traveled on or after April 8 to Pennsylvania or the countries of Andorra, Bermuda, Curacao, Poland, Serbia or Uruguay; traveled between April 8-April 22 to Connecticut; traveled between March 26-April 22 to Jordan; traveled between March 12-April 22 to Estonia; traveled between Feb 26-April 22 to San Marino; traveled on or after March 26 to Delaware, Michigan, Rhode Island, or Hungary; traveled on or after March 12 to the states of New Jersey or New York or the State of Palestine; traveled on or after February 26 to the countries of Czechia, San Marino or Montenegro; taken a sea or river cruise since March 15 2020; and/or participated in an out-of-state mass gathering of more than 500 people (where masks were not worn and it was impossible to keep further than 6 feet apart). If someone falls into this category they can 'test out' of a 10-day quarantine by taking a test on day 6 of quarantine and being released on day 8 when the negative result comes through (instead of day 11). Fully vaccinated travelers are exempt from entry requirements. Massachusetts-10 day quarantine in place All out-of-state arrivals must quarantine for 10 days (even residents) or produce a negative Covid-19 test taken in the last 72 hours. Fully vaccinated people are exempt. The Androscoggin Valley river in New Hampshire. getty New Hampshire-international travelers quarantine Domestic visitors do not need to get tested or quarantine but travelers are asked to get tested 3-5 days after arrival. Anyone who has traveled internationally (or on a cruise ship) within 10 days of arrival must quarantine for 10 days but they have the option of testing out at day 7, after taking a test on day 6. There are several situations where people are exempt, for instance, if they have undertaken essential travel to and from Canada, have had Covid-19 or have been vaccinated. New Jersey-quarantine for 7 days, with negative test The state is currently advising against all non-essential interstate travel. Anyone returning from a state which isn't New York, Connecticut, Pennsylvania and Delaware are advised to quarantine voluntarily for at least 7 days even with a negative test result (ten days if not tested). Travelers from other than these four states are asked to complete an online survey. The Red Rocks area of Northern New Mexico. getty New Mexico-Hawaii is still the only low risk state Whilst there is no longer a mandatory quarantine in place, New Mexico strongly advises visitors to self quarantine for 10 days or the length of their stay if shorter. There are exemptions from low-risk states but Hawaii is the only one currently deemed low risk. Oregon-quarantine for 14 days for all travelers Any arrivals into Oregon, including returning residents from out-of-state, must self-isolate for 14 days. Non-essential travel and tourism is ill-advised. Vaccinated travelers are exempt from travel restrictions and requirements. Rhode Island-25 states above 5% threshold Rhode Island visitors must quarantine for 10 days if arriving from states which have a positive testing rate of 5% or more, or they can opt out if they have a negative Covid-19 test taken in the last 72 hours. However, international arrivals must still quarantine. Visitors from out-of-state must also complete a certificate of compliance and a travel screening form. The updated spreadsheet of states which are above 5% lists 25 states: Alabama, Arkansas, Colorado, Delaware, Florida, Georgia, Idaho, Iowa, Kansas, Kentucky, Michigan, Minnesota, Mississippi, Missouri, Nevada, North Carolina, North Dakota, Oregon, Pennsylvania, South Carolina, Tennessee, Utah ,Virginia, Washington and Wyoming. However, if people have had Covid-19 in the past 90 days and completed isolation periods, they do not need to test or quarantine upon arrival. Autumn in Vermont getty Vermont-no quarantine with negative tests Anyone who is fully vaccinated does not need to quarantine and for the un-vaccinated, if they are in possession of a negative PCR Covid-19 test result, taken within the last 72 hours, no quarantine is required. Anyone arriving from overseas into Vermont must follow the CDC's guidance on what to do-get tested and quarantine for 7 days, regardless of the result, or self-isolate for ten days without a test. Washington D.C.-testing 72 hours before travel Out-of-state travelers must take a PCR test 72 hours before they leave and not travel on a positive test-another test must be taken between three to five days after arrival. As of 2 May, there are several low-risk states which are exempt from the restrictions: Alabama, Arkansas, California, Hawaii, Kansas, Louisiana and Mississippi. Virginia and Maryland remain exempt, as are people who have been fully vaccinated or who have had Covid-19 within the last 90 days.
