IALA MARITIME BUOYAGE SYSTEM

Two forms of the IALA System :

- IALA System “A”-Europe, Africa, and Asia. Green buoys mark the starboard side of a channel in the “A” system.**
- IALA System “B” -North, Central, and South**

- During the IALA conference in November 1980 two navigation marking systems, ie the System A (red colour for the left hand of the ship) and the System B (red colour for the right hand of the ship), were combined into one - the IALA System.
- In the IALA System the regional (of the systems A and B) principle of painting of the lateral signs was maintained. The countries that accepted the red colour for the left hand lateral sings were included in the region A. The countries that use the green colour for the left hand lateral signs were included in the region B. In the both regions, the fairway direction is the one leading from the sea (when a different manner is used than an adequate notice is provided).

Doctors can treat severe chronic hepatitis B with antiviral medications. Hepatitis C can spread through unprotected sexual intercourse, but this is a less common way to transmit it. Learning more about each type of hepatitis can help you better understand the condition as a whole.Hepatitis A is the most easily transmitted of the three viruses. Currently, there are an estimated 6 million people living with hepatitis in the United States, and more than 50,000 people are diagnosed with this disease every year. It can cause cirrhosis, which means that your normal liver tissue is replaced with scar tissue. However, it can cause serious illness in some people. Although there are five types of viral hepatitis, only A, B and C are the forms commonly found in the United States.Resource Links:ĕĀĀĀHepatitis A, B, and C: Learn the Differences.ĕĀĀĀ Immunization Action CoalitionĕĀĀĀWhatĕĀĀĀs the Difference Between Hepatitis A, B and C?,ĕĀĀĀ UNC Health TalkĕĀĀĀThe ABCs of Hepatitis,ĕĀĀĀ Centers for Disease Control and PreventionĕĀĀĀWhatĕĀĀĀs the Difference: Hepatitis B vs Hepatitis C?,ĕĀĀĀ Hepatitis B Foundation MORE FROM SYMPTOMFIND.COM Cookies We use technical and analytical cookies to ensure that we give you the best experience on our website. This form of hepatitis causes a chronic illness in over 50% of people who get this type of the virus. Hepatitis A causes a short-term, acute sickness that most people heal from without treatment. It typically spreads through feces-contaminated food or water and is found in the feces

of people who have the virus. It can also cause liver cancer.
